Sleepyze PocketGel Plus

With temperatures fluctuating between super toasty and icy cold, finding a mattress that works all year round can be a challenge. That's why we've created the PocketGel Poise Plus 3200 to answer your every temperature need whilst providing medium soft support.

Benefiting from our advanced Staycool™ Gel, this mattress also features our ViroFresh™ technology. Our game-changing anti-microbial technology kills 99.9% of bacteria and viruses on contact for a more hygienic night's sleep.

The Poise Plus 3200 has also been approved by the Good Housekeeping Institute – “Comfortable, cool and luxurious; our panel loved this mattress. It supported and soothed them throughout the night and gave them an excellent quality of sleep”.
– Good Housekeeping Institute independent tester
